

information, would decline to give consent for treatment. Please ensure this letter is communicated to all patients.

2. Part of the Police investigation revolves around the alleged unlawful suppression of alternative treatments which have a far better safety profile. Informed consent is not possible if there is no discussion around safer alternatives.
3. Informing the patient of how much active ingredient is in each vial. The amount of active ingredient in each vial varies and it is a matter of public record that some batches kill and maim disproportionately. Witness statements will be considered by the Police from bad batch victims. By way of example; one of them is now infertile, others have been suffering with mobility and paralysis of the face and limbs and many others are suffering from serious heart conditions such as myocarditis/pericarditis/myopericarditis. These people have medical evidence which states that the injection caused the infertility, immobility, paralysis and heart conditions. It is a fact that they received bad batches.

As informed consent is impossible to obtain, anyone injected on site has suffered a battery, regardless of any injury sustained.

Can you come back to me confirming that the immunisation programme you are involved in has been cancelled.

Yours faithfully

Lois Bayliss
