

To: XXXXXXXX Primary School, High Street, XXXXXXXX, YYYYYYYYYY, DNnn xnn

This letter has been delivered to GP surgeries and pharmacies.

This is a formal letter giving you the current legal status regarding CoViD-19

As an employer, you need to ensure all employees are aware of CoViD-injection / 'vaccine' adverse reaction information. Your employees need to know to report adverse reactions to the UK Government Yellow Card system, the police and/or a solicitor.

In the UK, on 9th February 2022, the MHRA reported totals of **2,017** deaths with **1,458,428** injuries suffered by **445,256** people due to CoViD-19 injections. It is likely that most injuries have not been reported.

EudraVigilance have reported on 12/02/22, **39,997** deaths following CoViD-19 injections with **1,510,976** people injured. Up to 11/02/22: USA government's VAERS database: **23,990** CoViD-19 injection deaths, with Injuries reported for **1,119,061** people.

There are many legal representatives and medical specialists involved in international legal investigations. Over 1,500 pieces of evidence have been accepted by the CID at Hammersmith police station with more accepted at police stations around the UK.

If parents and pupils were not made aware of the risks or that they were part of a clinical trial, they have not been able to exercise informed consent, which is their right by Law. Any adverse reactions/ harms now need to be reported to the police and/or a solicitor, as well as to the UK Government Yellow Card system.

With the above information, you and staff at your school could be considered liable, if continuing to promote or allow administration of CoViD-19 injections/ 'vaccines'. It is important to understand how this investigation may relate to you personally and as a workplace. Legal advice can be sought from Broad Yorkshire Law and/or PJH Law.

www.broadyorkshirelaw.co.uk / <https://pjhlaw.co.uk>

Many people in the media are legally implicated due to the suppression of this information. It is because of this censorship that Individuals, communities and charities are now working with the police and lawyers to inform healthcare workers, business owners/ managers and the general population of these crimes relating to CoViD measures.

Thank you for your time and attention,

Concerned citizens of the United Kingdom
