

Is there any evidence that any lockdown can help?

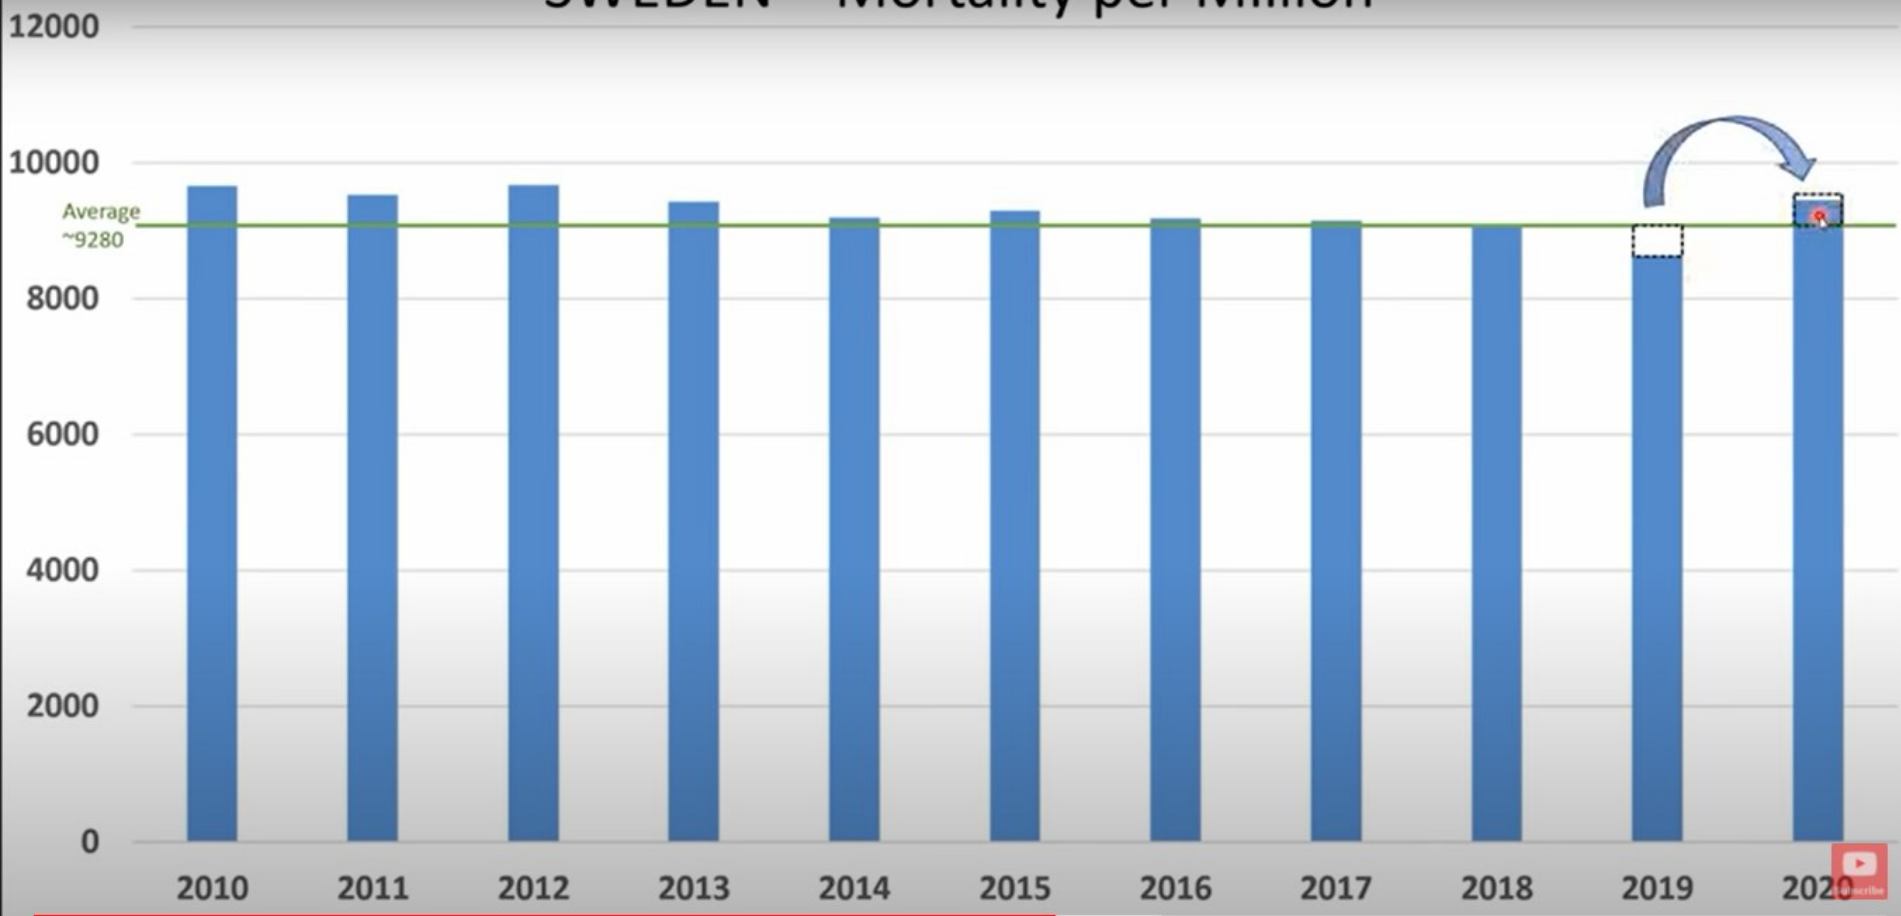

Sweden Sept 25TH 2020 – Epidemic Long Over

Sweden did not lockdown. No closure of schools or businesses.
Very little social distancing. Very little masking.

Sweden had almost no seasonal influenza in 2019. Early in 2020 Sweden copied the UK in moving many old unwell people from hospitals to care-homes where they were some were given midazolam and died. As in the UK some tested positive with PCR but most did not.

Recent BBC Article on Excess Death - Explained from the DATA!

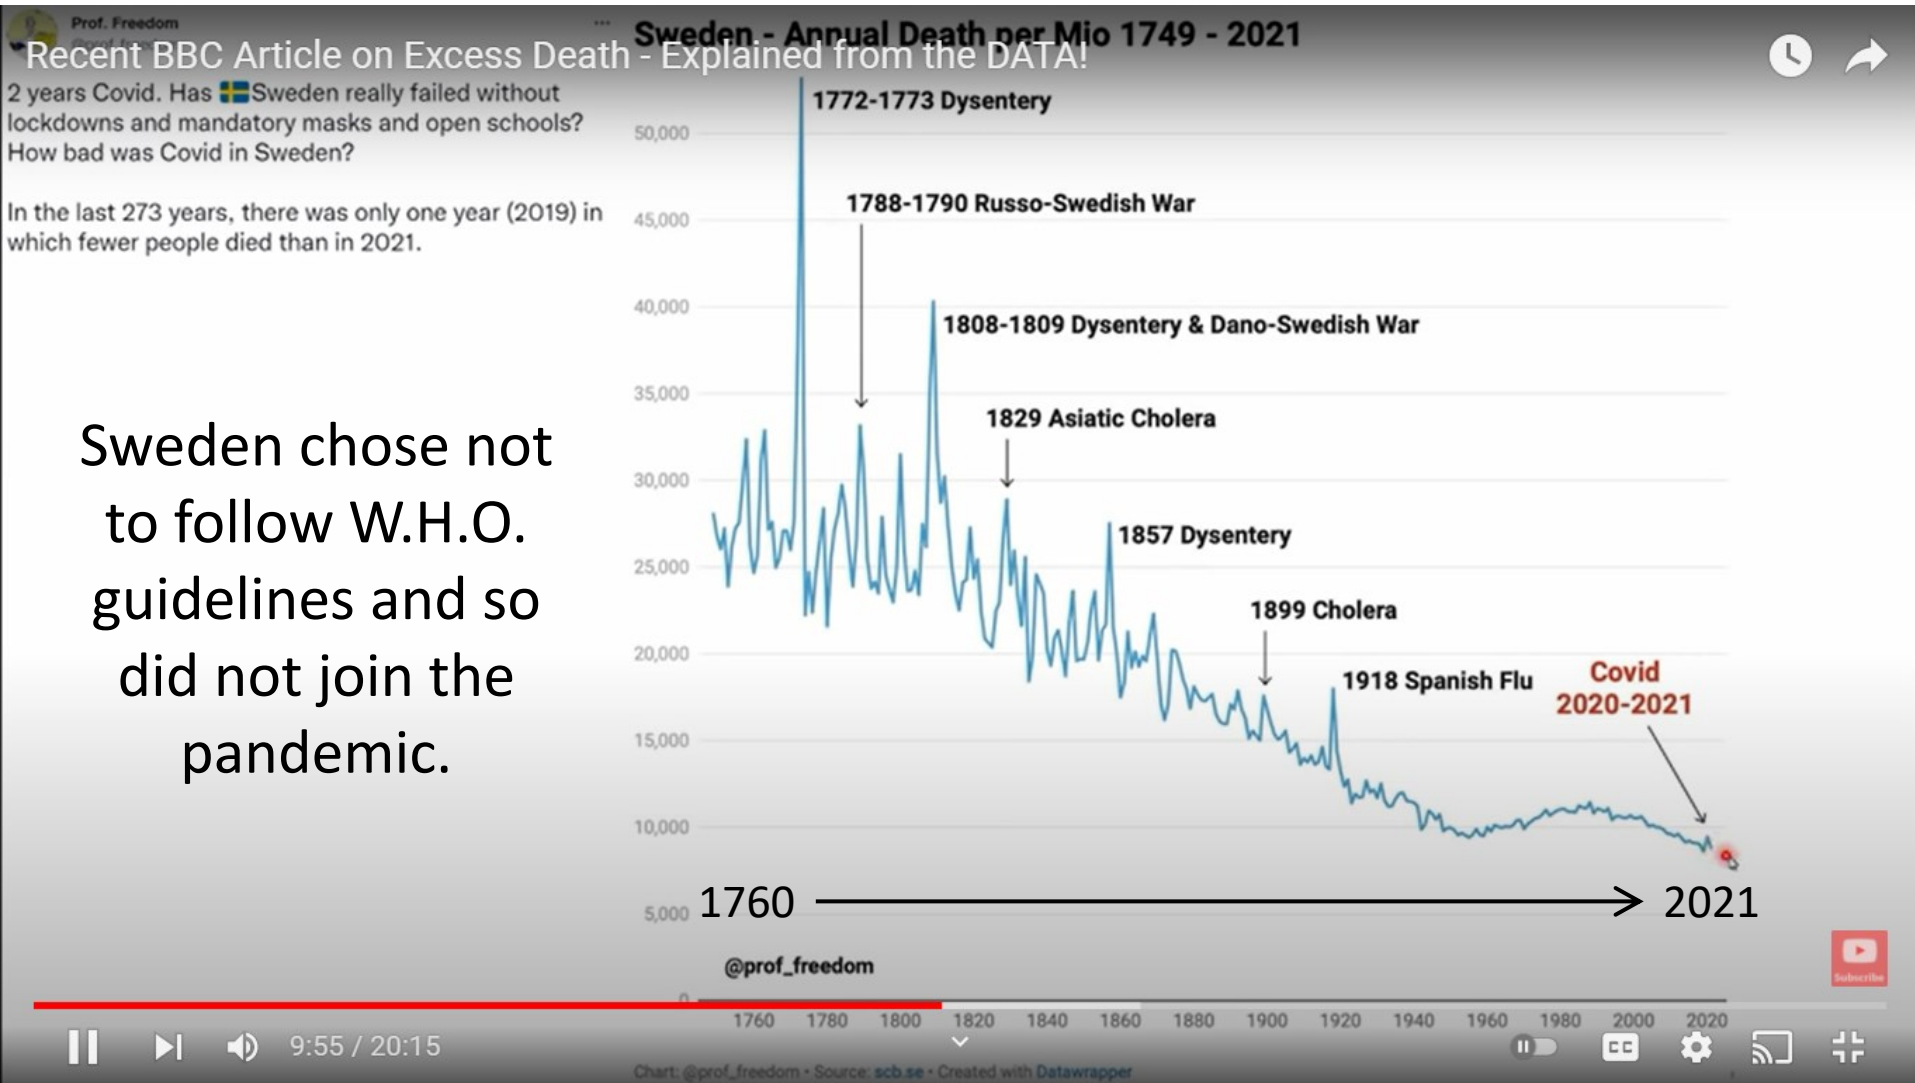

SWEDEN - Mortality per Million

Looking back over 273 years, 7 spikes in deaths-in-Sweden are labelled below. Five are due to poor sanitation, with dysentery and cholera finally being brought under control in 1899.

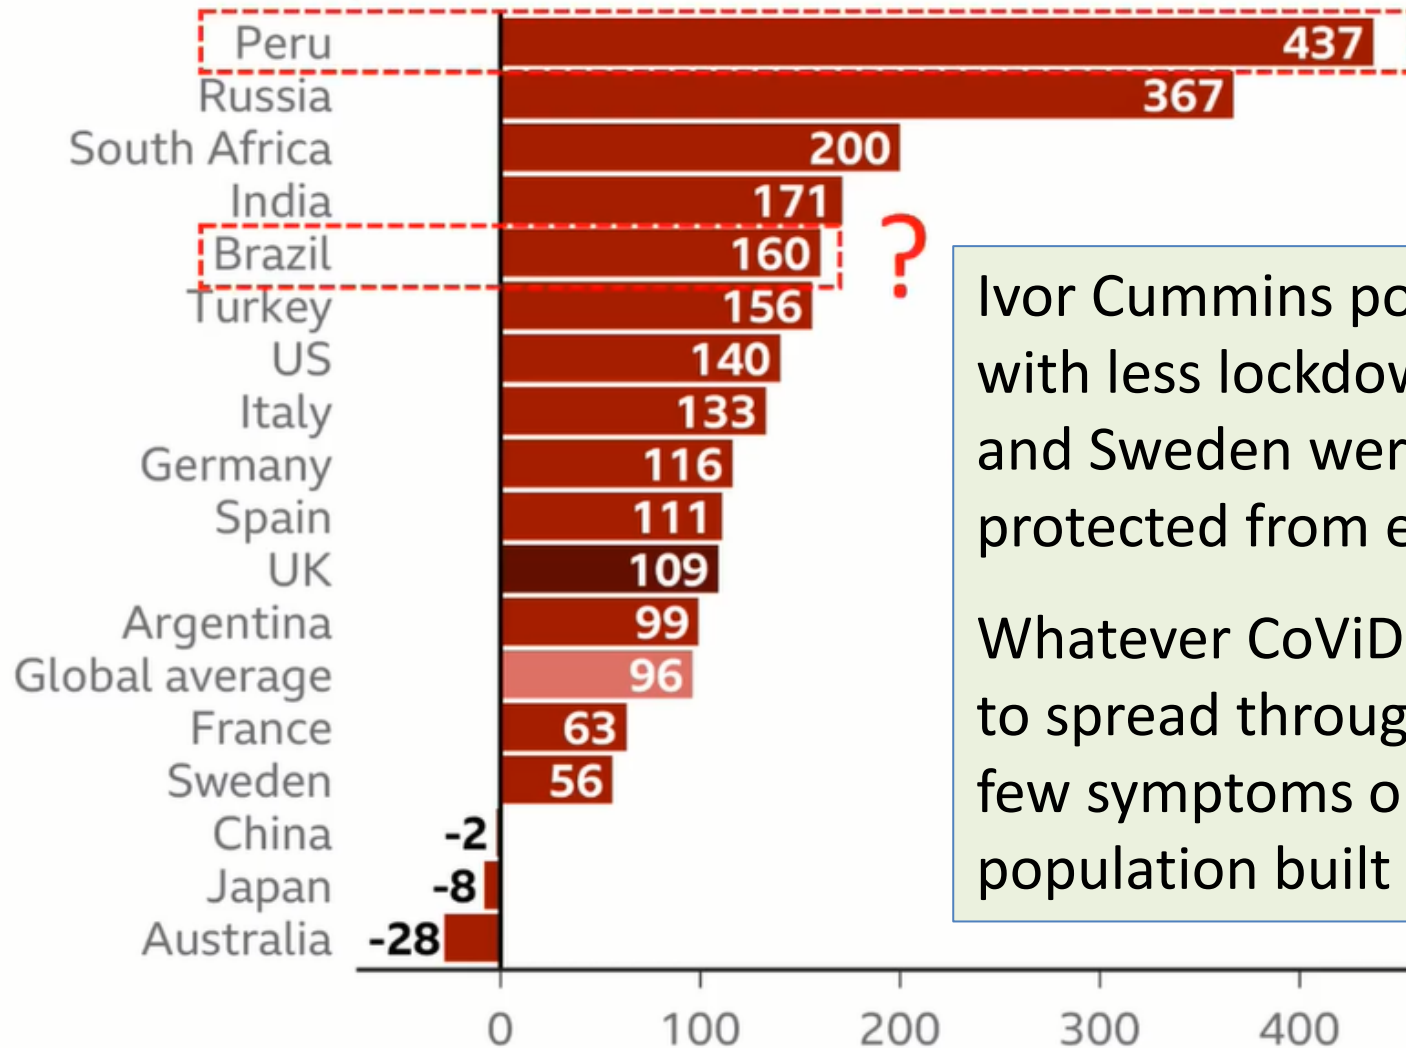

The other 2 relate to wars, with the '1918 Spanish Flu' coming at the end of World War 1 (1914-1918) with, as the name suggests, affected the whole world.

Sweden chose not to follow W.H.O. guidelines and so did not join the pandemic.

Different countries, different pandemics

Excess deaths per 100,000 in 2020 & 2021, selected countries

Ivor Cummins points out that with less lockdown; Brazil, Japan and Sweden were better protected from excess deaths.

Whatever CoViD was, it seemed to spread through Sweden with few symptoms or deaths as the population built immunity to it.

Note: Excess death rates are calculated as an average of the rates for 2020 & 2021
